

DEAD ZONE BAGS™

"LET YOUR MOBILE DEVICE REST IN PEACE"

Usage Instructions:

Thank You for your purchase of a Dead Zone Bag™ Faraday Principle, Radio Signal Blocking Bags for Mobile Phones and Devices.

Your Dead Zone Bag™ was proudly MADE IN THE USA with the finest materials and workmanship. To ensure that your Dead Zone Bag™ is functioning properly and blocking radio signals to and from your mobile device; carefully follow these simple instructions and care procedures.

Although, Dead Zone Bags™ are made with durable, 100% Stainless Steel Mesh Fabric, it is very important to inspect your Dead Zone Bag™ for even the smallest holes and tears before each use. Small holes or tears, even smaller than 1/8" of an inch (3 mm) can allow radio signal leakage, reducing the bag's ability to block radio signals.

Keep bag away from sharp or pointed objects. Do not crush bag, step on bag or allow bag to drop on pavement or other hard, abrasive surface. Clean bag by hand in sink or with hose. If needed: use liquid soap such as Dawn Dishwashing Soap, Without bleach. Air dry bag completely before use.

Dead Zone Bags™ is a trademark of American Home & Habitat Inc., Specialized Textile Outfitters - www.ahh.biz

1. Unfold your Dead Zone Bag™ and inspect it for holes or tears. Bag may not work properly if holes or tears are present.

2. Insert Mobile device into bag. Note the Loop fastener located just inside the top edge of the bag opening.

3. Hold bag upright and ensure that mobile device is resting completely in the bottom one third of the bag. If mobile device does not fit in the bottom 1/3 of the bag, mobile device is too big; get a bigger Dead Zone Bag™

4. While holding mobile device stationary in the bottom 1/3 of the bag, fold the bag as shown. Note the position of the Loop Fastener on the outside of the bag.

5. Make another fold at the top 1 / 3 of the bag.

6. After folding, expose the Loop fastener inside the upper seam of the bag and close it down onto the mating Hook Fastener on the outside of the bag.

7. Lightly press down along the whole length of the mated Hook & Loop Fastener to ensure proper seal & closure.
